

PATIENT ID PT-3627	SCREENING DATE 23 Aug 2026	MODE USED Mode 3 — Fusion
-----------------------	-------------------------------	------------------------------

CLINICAL PARAMETERS

Age	78.0 yrs	Glucose	56.0 mg/dL
BMI	56.0 kg/m ²	Diastolic BP	45.0 mmHg

RETINAL IMAGE ANALYSIS — GRAD-CAM

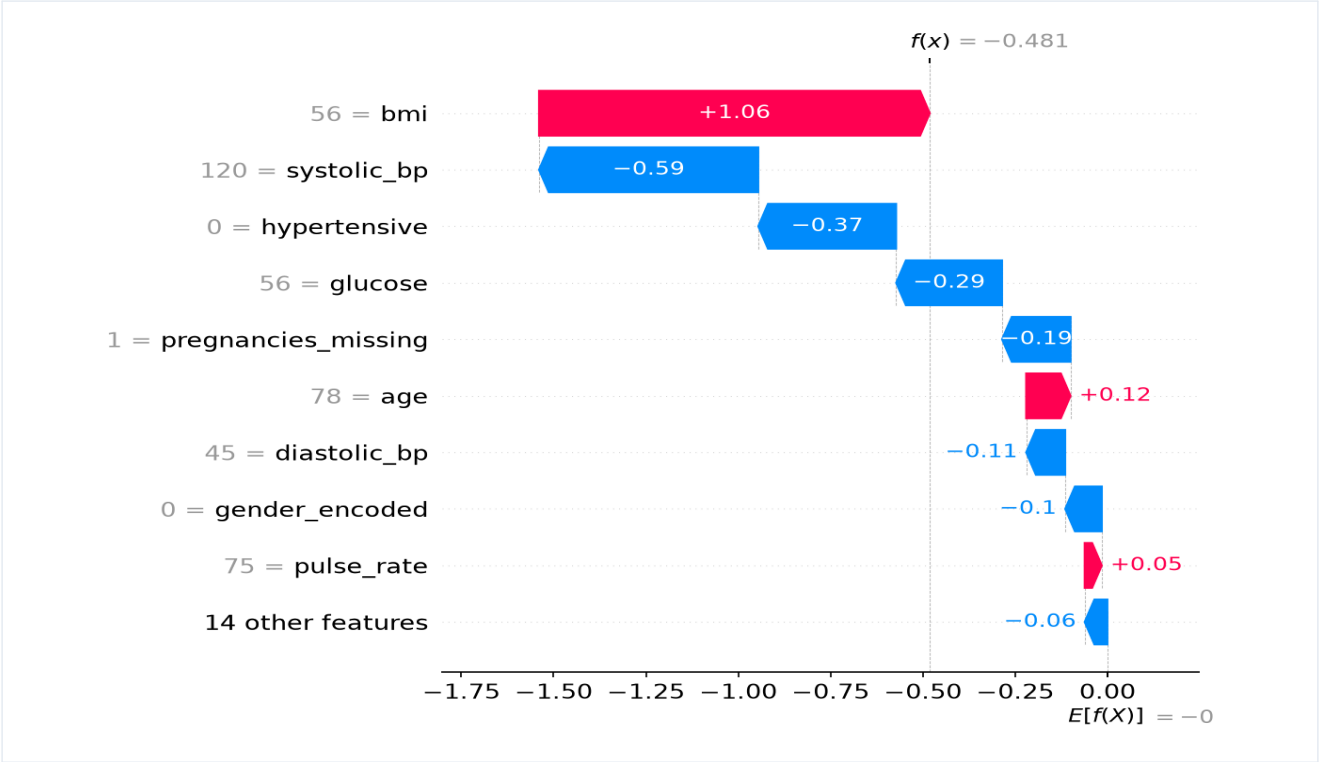

Original image

Grad-CAM heatmap

Heatmap highlights regions the model identified as most influential in classifying this retina as **Mild NPDR** (Stage 1), 52.6% confidence.

CLINICAL RISK EXPLANATION — SHAP

Each bar shows how a clinical parameter shifted this patient's risk score, ranked by impact.

CLINICAL RECOMMENDATIONS

- Schedule ophthalmological review within 3–6 months.
- Review glycaemic control and blood pressure management with primary physician.
- Repeat screening in 6 months to monitor progression.
