

PATIENT ID PT-9099	SCREENING DATE 20 Aug 2026	MODE USED Mode 1 — Clinical Only
-----------------------	-------------------------------	-------------------------------------

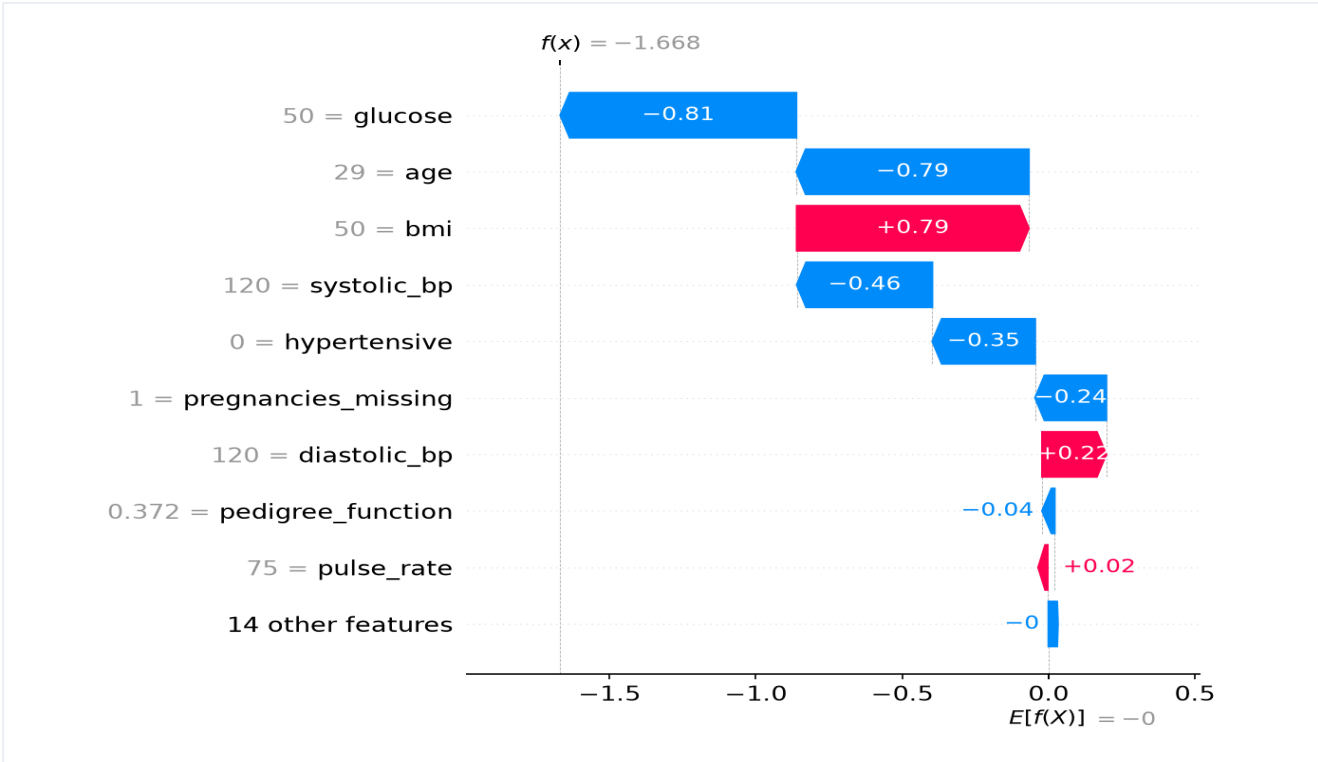

Clinical Risk Assessment

BASED ON
13 clinical parameters (no retinal image provided)

CLINICAL PARAMETERS

Age	29.0 yrs	Diastolic BP	120.0 mmHg
Glucose	50.0 mg/dL	BMI	50.0 kg/m²

CLINICAL RISK EXPLANATION — SHAP

Each bar shows how a clinical parameter shifted this patient's risk score, ranked by impact.

CLINICAL RECOMMENDATIONS

- No retinal image was provided — this assessment is based on clinical risk factors only. A retinal examination is recommended to confirm DR status.

- Continue routine annual diabetic retinopathy screening.
- Maintain current glycaemic control — values are within a healthy range.
- No urgent ophthalmological referral indicated based on current screening result.
