

PATIENT ID PT-1003	SCREENING DATE 20 Aug 2026	MODE USED Mode 1 — Clinical Only
-----------------------	-------------------------------	-------------------------------------

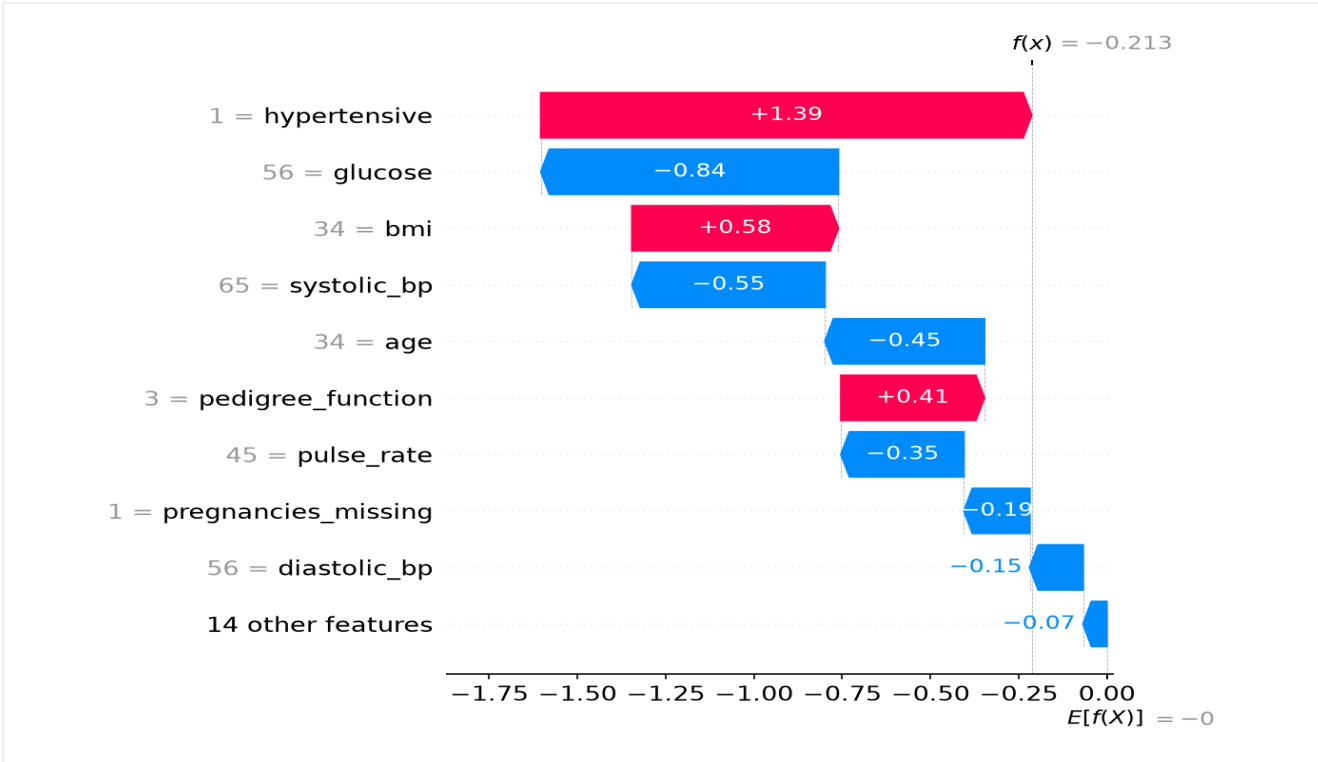

Clinical Risk Assessment

BASED ON
13 clinical parameters (no retinal image provided)

CLINICAL PARAMETERS

Age	34.0 yrs	Diastolic BP	56.0 mmHg
Glucose	56.0 mg/dL	BMI	34.0 kg/m²

CLINICAL RISK EXPLANATION — SHAP

Each bar shows how a clinical parameter shifted this patient's risk score, ranked by impact.

CLINICAL RECOMMENDATIONS

- No retinal image was provided — this assessment is based on clinical risk factors only. A retinal examination is recommended to confirm DR status.

- Schedule ophthalmological review within 3–6 months.
- Review glycaemic control and blood pressure management with primary physician.
- Repeat screening in 6 months to monitor progression.
